

## Feedback

### *What's working*

1. The animation itself is quite successful.
2. Developed a quick method to do animation.
3. The publication gives a sense of all the frames that have gone into the animation.

### *What's not working*

1. The publication could have more context and add more behind-the-scenes explanations.

### *To be developed*

1. The order, sequence, and style of the short film can be changed to see how it alters the meaning of the story (as done in positions through iterating).
